**Bright Horizons Montessori Schools are inspiring, carefully planned learning environments designed for children to discover the joy of learning and for educators to reach their full potential. As a teacher in one of our schools, you can develop authentic Montessori programs for children — from infants through adolescents — in an environment that encourages lifelong learning and supports your success within our organization.**

## The Montessori Vision Combined with Your Expertise

The approach to education designed by Maria Montessori is grounded in the belief that a child learns best within a social environment that supports and respects each individual's unique development. Maria Montessori's methods helped shape early education around the world — and the programs at Bright Horizons are deeply committed to sustaining this unique vision. Each of our Montessori programs encourages children to develop independence and confidence and to learn at their own pace. Classroom environments and educational materials are classic Montessori, and instructional techniques follow the Montessori method.

Bright Horizons Montessori schools fully embrace the traditional approach of children working, learning, exploring, and developing in mixed-age groups, experiencing the joy of learning and building their knowledge under the gentle guidance of a specially trained teacher. Our community of educators is dedicated to the vision and principles of Maria Montessori.

## An Environment Where You Flourish

Bright Horizons is the world's leading provider of early care and education, and we currently operate numerous Montessori programs throughout the country.

We believe our success lies in the fact that, despite our growth, we remain the "biggest small company," where individual growth and contribution are supported. Our size and reach allow us to provide our teachers with an array of training and advancement opportunities. From our online university to tuition reimbursement and recognition programs, we are committed to growing our teachers and creating the experiences they need to reach the next stage in their development.
