

Sticky Note Number Matching

Materials Needed:

- ▶ Sticky notes or small pieces of paper
- ▶ Sharpie marker or pen

Directions:

Make three sets of sticky notes where each has a number 1 through 10.

Place one set on a wall lined up in order.

Hide the other two sets around the house.

As a number is found match it to the number on the wall and place it under as a match.

Too easy? You can also just hide numbers and when two are found, add them together. As each number is found, add it to the total.

Toddlers..... Love finding things. Hide one set of numbers and say the number when it's found. Move your mouth slowly so they can see how your mouth moves when you are saying the number. Associate the number with objects, e.g. having one nose and two hands.
